History:

COSMOS Township, organized January 25, 1870, has a name proposed by Daniel Hoyt, one of its first settlers, who came in 1867, was a surveyor, and was elected the first township clerk. It is an ancient Greek word meaning "order, harmony," and thence the universe as an orderly and harmonious system. The city in sections 15, 16, 21, and 22 was incorporated as a village on September 21, 1926, and as a city in 1969; a post office was established in Renville County in 1870 and transferred to Meeker County in 1872, closing in 1906 and reestablishing in 1924; it had a station serving several rail lines including the Minnesota and Western Railroad.

Description

Crop productivity index ratings provide a relative ranking of soils based on their potential for intensive crop production. An index can be used to rate the potential yield of one soil against that of another over a period of time. Ratings range from 0 to 100. The higher numbers indicate higher production potential. The rating is not crop specific.

When the soils are rated, the following assumptions are made: a) adequate management, b) natural weather conditions (no irrigation), c) artificial drainage where required, d) no frequent flooding on the lower lying soils, and e) no land leveling or terracing. Even though predicted average yields will change with time, the productivity indices are expected to remain relatively constant in relation to one another over time.
